

Homework 5

Suppose you have a file, `roster.txt`, that contains all of the names on the roster of a class with one name per line. Write a program that allows the user to query whether or not a certain person is in that class.

Sample Output

Who would you like to check for in this class?

Matt Murdoch

Matt Murdoch is not in the class.

Who would you like to check for in this class?

Charles Xavier

Charles Xavier is in the class.

Who would you like to check for in this class?

Max Eisenhardt

Max Eisenhardt is in the class.

(and so on)
