Quiz 7

Suppose we have an array of integers.

```
nums = [2, 4, 5, 2, 6, -3, 23]
```

I. Fill in the blanks in the loop to print the numbers in the array `nums`.

```
for _____ in _____:
        print _____
```

II. Recall that we also wrote for loops using the range() and len() functions. Fill in the blanks in the loop to print the numbers in the array nums.

```
for _____ in range( _____ ):
        print _____
```

III. Suppose you have an array of integers 0 to 100.

```
nums = [0, 1, 2, 3, 4, ... , 100]
```

Fill in the blanks of this loop to print all of the odd numbers in `nums`.

```
for _____ in range( _____ ):
        if _____:
                print nums[i]
```
